Determination Regarding Holding Meeting Without Anchor Location

Public Body: Uniform Building Code Commission

Chair Name: Casey Vorwaller

The public meeting(s) scheduled for 12/17/2020 (Date or date range) will be conducted electronically and without an anchor location. I have determined meeting with an anchor location presents a substantial risk to the health and safety of those who may be present at the anchor location.

Facts upon which my determination is based:

Governor Gary Herbert issued Utah Executive Order 2020-1 declaring a state of emergency in response to COVID-19, and pursuant to Utah Executive Order 2020-5, modified the Open and Public Meetings Act requirements allowing electronic meetings without an anchor location. Utah Executive Order 2020-5 allows a public body to hold an electronic meeting, to provide means by which interested persons and the public may remotely hear or observe by audio or video transmission the open portions of the meeting. As a result, the Uniform Building Code Commission determines that there is substantial risk to the health and safety of those who may be present and will therefore be conducting its public meeting referenced above electronically, without an anchor location.

Section B

Uniform Building Code Commission - Summary of recommended amendments to construction codes under Title 15A, State Construction and Fire Code Act.

2020 ICC Code Proposed Statewide Amendments Summary and Fiscal Analysis

Statute/Code Section	Proposed Amendment	Fiscal Impact
15A-3-202 IRC Section R202 IRC Section 327	Utah has seen significant increases in energy storage systems (battery backup systems). New technologies, such as lithium, run higher risks for thermal runaway and can potentially cause fires. New testing standards for such systems need to be enforced to ensure safety of systems. The 2015 IRC currently adopted by Utah does not contain any provisions or requirements for energy storage systems. Adopting this amendment will ensure such systems are installed in a safe manner and equipment is properly tested and listed.	Cost impact will be minimal if a battery system is installed in a garage requiring only a heat detector which is less than \$100. If installed in a home, typex 5/8" drywall is required on the walls and ceiling, resulting in additional costs of \$14/sheet. Total costs will vary depending on size and dimensions of room. There will be no other costs besides installation.
15A-3-206 IRC Section E3901.4.5	Provides for a cord length below the counter of around 13.5". Allows for a depth of counter to be more than 6" while not allowing any more cord to hang over the edge of the counter.	No cost impact. May provide cost savings to projects and allow more flexibility with construction.
15A-3-206 IRC Chapter 44	Adds a reference standard	No Cost or savings impact.
15A-3-601	Expanding GFCI coverage to all areas of	Approximate cost savings of

NEC Section 210.8(A)(5)	finished basements is not justified. This amendment deletes “Basements” replaces it with, “Unfinished portions or areas of the basement not intended as habitable rooms” Finished areas of basements are not as hazardous as bathrooms or kitchens where small appliances are used near sinks or tubs and GFCI coverage is warranted.	\$16/unit with an average of 4 GFCI units per home area or \$64.
15A-3-601 NEC Section 210.8(F)	The 2017 NEC provides adequate language regarding GFCI protection for condenser units. NEC 2020 expands the use of GFCI with unintended consequences and is unwarranted. This amendment deletes the 2020 language and restores the 2017 NEC language.	Potential cost savings of approximately \$136 per home. Potential cost savings of approximately \$124 per unit for multi-unit buildings.
15A-3-601 NEC Section 230.67	The 2017 NEC provides adequate language regarding surge protection and the 2020 NEC language creates potential issues with mandating currently available surge-protection products in all cases. This amendment deletes the 2020 NEC language and restores the 2017 NEC language.	Potential cost savings of approximately \$246 per home. Potential cost savings of approximately \$246 per unit for multi-unit buildings.
15A-3-601 NEC Section 406.9(C)	Deletes 2020 NEC more restrictive language and requires instead that receptacles shall not be installed within or directly over a bathtub or shower stall.	No cost or savings impact.
